

**KoMo's Fidibus 21** flour mill is compact but powerful. At just 320mm tall, the Fidibus 21 performs well against larger mills. Inside its attractive beech wood veneer cabinet are a set of advanced corundum-ceramic burrs and a strong, high efficiency motor with the torque and stamina needed for grinding grain. The solid beech wood hopper holds 850g of grain

The mill produces 100g of flour per minute flour, and can run continuously so you can refill and keep grinding for any quantity of flour you need. Its compact footprint makes it ideal for a smaller kitchen, a valuable tool for anyone exploring the joys of cooking with natural foods.

The Fidibus 21 flour mill, will grind wheat, oat groats, triticale, kamut, spelt, buckwheat, barley, rye, millet, and sorghum. It is not suitable for oilseeds like flax or sesame, popcorn, or fibrous materials.

Grind texture is continuously adjustable from fine flour to coarse meal and cracked grain, simply by turning the hopper bowl to align its index mark with the graphic scale on the front of the mill.

Clean-up is minimal and easy, and access to the milling chamber takes only a moment, requiring no tools.

KoMo flour mills and flakers are innovative designs developed by Wolfgang Mock of Germany and Peter Koidl of Austria.

**Charlotte's Living Harmony** is the only importer of KoMo flour mills and grain flakers to Australia and is proud to represent their fine European craftsmanship to our customers.

### **KOMO FIDIBUS 21 MILL**

Milling rate for bread flour:	100g
Hopper fill capacity:	850g
Millstone diameter	75mm
Electric motor size:	250W
Weight:	6.2kg
Max. height of bowl at spout:	120mm
Dimensions: H x D x W in mm:	320 x 160 x 155 (including spout)
Warranty:	12 years
